

Advanced Juniper Security (AJSEC

Engineering Simplicity

COURSE LEVEL

Advanced Juniper Security (AJSEC) is an advanced-level course.

AUDIENCE

This course benefits individuals responsible for implementing, monitoring, and troubleshooting Juniper security components.

PREREQUISITES

- Strong level of TCP/IP networking and security knowledge
- Complete the Juniper Security (JSEC) course prior to attending this class

ASSOCIATED CERTIFICATION

JNCIP-SEC

RELEVANT JUNIPER PRODUCT

- Security
- Junos OS
- SRX Series
- vSRX Series
- Sky ATP
- SDSN

COURSE OVERVIEW

This four-day course, which is designed to build off the current *Juniper Security* (JSEC) offering, delves deeper into Junos security, next-generation security features, and ATP supporting software.

Through demonstrations and hands-on labs, you will gain experience in configuring and monitoring the advanced Junos OS security features with advanced coverage of advanced logging and reporting, next generation Layer 2 security, next generation advanced anti-malware with Juniper ATP On-Prem and SecIntel. This course uses Juniper Networks SRX Series Services Gateways for the hands-on component.

This course is based on Junos OS Release 20.1R1.11, Junos Space Security Director 19.4, Juniper ATP On-Prem version 5.0.7.

OBJECTIVES

- Demonstrate understanding of concepts covered in the prerequisite *Juniper Security* courses.
- Describe the various forms of security supported by the Junos OS.
- Describe the Juniper Connected Security model.
- Describe Junos security handling at Layer 2 versus Layer 3.
- Implement next generation Layer 2 security features.
- Demonstrate understanding of Logical Systems (LSYS).
- Demonstrate understanding of Tenant Systems (TSYS).
- Implement virtual routing instances in a security setting.
- Describe and configure route sharing between routing instances using logical tunnel interfaces.
- Describe and discuss Juniper ATP and its function in the network.
- Describe and implement Juniper Connected Security with Policy Enforcer in a network
- Describe firewall filters use on a security device.
- Implement firewall filters to route traffic.
- Explain how to troubleshoot zone problems.
- Describe the tools available to troubleshoot SRX Series devices.
- Describe and implement IPsec VPN in a hub-and-spoke model.
- Describe the PKI infrastructure.
- Implement certificates to build an ADVPN network.
- Describe using NAT, CoS and routing protocols over IPsec VPNs.
- Implement NAT and routing protocols over an IPsec VPN.
- Describe the logs and troubleshooting methodologies to fix IPsec VPNs.
- Implement working IPsec VPNs when given configuration that are broken.
- Describe Incident Reporting with Juniper ATP On-Prem device.
- Configure mitigation response to prevent spread of malware.
- Explain SecIntel uses and when to use them.
- Describe the systems that work with SecIntel.
- Describe and implement advanced NAT options on the SRX Series devices.
- Explain DNS doctoring and when to use it.
- Describe NAT troubleshooting logs and techniques.

COURSE CONTENT

Day 1

- 1 COURSE INTRODUCTION
 - Junos Layer 2 Packet Handling and Security Features
 - Transparent Mode Security
 - Secure Wire
 - Layer 2 Next Generation Ethernet Switching
 - MACsec

Firewall Filters

LAB 1: Implementing Layer 2 Security

- Using Firewall Filters to Troubleshoot
 - Routing Instances
 - Filter-Based Forwarding

LAB 2: Implementing Firewall Filters

4 Troubleshooting Zones and Policies

- General Troubleshooting for Junos Devices
- Troubleshooting Tools
- Troubleshooting Zones and Policies
- Zone and Policy Case Studies

LAB 3: Troubleshooting Zones and Policies

Day 2

- 5 Hub-and-Spoke VPN
 - Overview
 - Configuration and Monitoring

LAB 4: Implementing Hub-and-Spoke VPNs

- 6 Advanced NAT
 - Configuring Persistent NAT
 - Demonstrate DNS Doctoring
 - Configure IPv6 NAT Operations
 - Troubleshooting NAT

LAB: 5: Implementing Advanced NAT Features

7

Logical and Tenant Systems

- Overview
- Administrative Roles
- Differences Between LSYS and TSYS
- Configuring LSYS
- Configuring TSYS

LAB 6: Implementing TSYS

Day 3

- 8 PKI and ADVPNs
 - PKI Overview
 - PKI Configuration
 - ADVPN Overview
 - ADVPN Configuration and Monitoring

LAB 7: Implementing ADVPNs

- 9
- Advanced IPsec
- NAT with IPsecClass of Service with IPsec
- Best Practices
- Routing OSPF over VPNs

LAB 8: Implementing Advanced IPsec Solutions

- 10 Troubleshooting IPsec
 - IPsec Troubleshooting Overview
 - Troubleshooting IKE Phase 1 and 2
 - IPsec Logging
 - IPsec Case Studies

LAB 9: Troubleshooting IPsec

Day 4

11	Juniper Connected Security Security Models Enforcement on Every Network Device
12	SecIntel Security Feed Encrypted Traffic Analysis Use Cases for SecIntel LAB 10: Implementing SecIntel
13	Advanced Juniper ATP On-Prem Collectors Private Mode Incident Response Deployment Models LAB 11: Implementing Advanced ATP On-Prem

14	Automated Threat Mitigation Identify and Mitigate Malware Threats Automate Security Mitigation LAB 12: Identifying and Mitigating Threats
A	Group VPNsOverviewImplementing Group VPNs
